Who is NCSSFL?

NCSSFL is an organization of education agency personnel from across the United States who have the responsibility of foreign/world language education at the state level.

NCSSFL benefits from the support of Associate Members from states that do not yet have education agency personnel in foreign/world language education, from organizations whose missions include world language education, and from retired educators who have served in these roles.

The purpose of NCSSFL is to affect state and national policy and practice in language education through collaboration with other State Supervisors and Associate Members.
